

uniSCAN FMD PLUS

-  SECURITY CHECKPOINTS
-  BORDER CHECKPOINTS
-  MILITARY BASES
-  AIRPORTS
-  CORRECTIONAL FACILITIES & PRISONS
-  EMBASSIES & CONSULTATES
-  CRITICAL INFRA-STRUCTURE
-  MADE IN GERMANY

uniSCAN FMD PLUS is the worldwide proven system for ferrous metal weapons and threat detection, offering highest throughput and an appealing design. Featuring highly effective ferromagnetic detection (FMDS) technology, the uniSCAN FMD PLUS has been specifically designed to detect ferro-magnetic metal threat.

-  **Portable, Highest Throughput Screening:** Designed for high throughput environments with screening of 50 - 60 subjects per minute (3,000 - 3,600 per hour) and 95%+ clearance rate.
-  **Does not detect jewelry, coins, etc.:** Focus your screening only on ferromagnetic metal threats, such as guns, knives and similar items.
-  **Systems Integration:** Alarm output module allows for integration into Geutebrück security alarm management system
-  **Unlimited Deployment Options:** The uniSCAN FMD PLUS can be moved to any location, e. g. the lobby, a VIP banquet, security at the president suite, etc.
-  **Easy to Use:** No calibration and only one sensitivity control makes the uniSCAN FMD PLUS operation-ready in 10 seconds.
-  **100% Safe:** The uniSCAN FMD PLUS is a passive detector with no emissions of any kind. It is perfectly safe for all individuals, including those who are pregnant or have surgical implants.
-  **Maintenance Free:** No calibration, no annual battery replacement and no required service calls. The system itself is almost indestructible.
-  **Covert Screening:** The uniSCAN FMD PLUS can operate with both audible and visual alerts in the off setting using optional alarm output module.

KEY FACTS

COMPLETE INTEGRATION INTO GEUTEBRÜCK VIDEO SECURITY (CCTV) SYSTEM

The uniSCAN FMD PLUS can be fully integrated into a Geutebrück video security system, where all alarms are display remotely at the according operator station.

Via Geutebrück G-SIM ALARM MANAGEMENT, all alarms are monitored and followed up automatically.

Complete integration into Geutebrück CCTV & video security structure

Remote monitoring of all alarms

Facial recognition (optional via Geutebrück)

Silent alarm (no visible or audible alarm triggered, only displayed G-SIM)

Global monitoring of all sites with Geutebrück G-SIM GLOBAL ALARM MANAGEMENT

SPECIFICATIONS

CONTROLS	On/Off push button Sensitivity control for red alert Audible alarm on/off control	
POWER SUPPLY	Battery	12Vdc 4.5Ah sealed lead acid 100/240V AC Battery Charger
	Charge Time	Full: 4 hours
	Battery Run Time	10-16 hours on full charge
	Charging Ports	1 on front of unit, 1 on bottom of unit
TEMPERATURE RANGE	-10°C - +50°C +14°F - +122°F	
RELATIVE HUMIDITY	0-95%NC	
WEIGHT	Unit: 9kg	Base: 8.3kg
DIMENSIONS	Unit (WxDxH):	13.46cmx8.64cmx184.40cm
	Base (WxDxH):	34cmx34cmx36cm
	Wall Mount Profile:	9.14cm
ALARM OUTPUT ADAPTER (OPTIONAL)	3 dry contact relays 24VAC 40VDC	
IP RATING	IP54 (Sensor Unit) IP40 (Battery Charger)	
ACCESSORIES	Network alarm module, wall mounting kit, Geutebrück Integration Kit
